

REMU BOMB-PROOF SCREENING BUCKET FOR UNIFIL PEACEKEEPING FORCE
31.10.2006

Special equipped REMU EX 180 HD screening bucket was recently delivered to Finnish peace keeping force Unifil in Parola. Bucket will be used for screening of finer top soil, the bigger material left in the bucket will contain f.ex. cluster bombs. The special bucket is totally made of wear steel to make the bucket endure the explosions of cluster bombs. The basic machine is 30 tn excavator equipped with armoured cabin. The Finnish defence force has used equal bucket for years in screening of anti-aircraft grenades.
